DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 78-81 and 87-98 are drawn to a laser device comprising a laser light source..., a modulator..., and a deflector..., classified in class 372, subclass 64.
- II. Claims 82-86 are drawn to a laser source comprising an ultraviolet laser light source..., a deflector..., wherein the deflector irradiates a screen..., classified in class 372, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the specific requirement of the modulator is required in the invention I but not required in the invention II. The specific requirements of the ultraviolet laser source and the screen are required in the invention II but not required in the invention I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
